

In this activity you are expected to list the ideas (at least 4 per each team member) by organizing the brainstorming session and prioritize the top 3 ideas based on the feasibility & importance.

Best 3 Ideas:

S. No.	Ideas
1	We can have a decision tree based on the dataset and infer on what will happen for the current day
2	This application can be a web-app so that the users can access the application without any downloading and can use in all devices
3	If the dataset has information about the delay, we can have an advanced application where current scenario can influence the result.
